Introduction

National Pricing Indicators (NPI) is a useful companion to your weekly pricing survey. Its purpose is to provide you with the “big picture” on the APY direction as well as repricing volume.

In addition to the weekly pricing indicators, the NPI features a historical prospective of the indicators, which can be used to detect emerging trends in pricing.

The NPI contains four useful indexes - Weekly APY index, Premium APY index, Repricing Index, and historical APY . Each of these indexes is designed to provide you with a different prospective on pricing practices and trends.

NPI measures selected term and no term deposit products in its indexes. These deposit products are all at the \$10K tier level:

CD - Regular,, 3, 6, 9, 12, 24, 30, 36, 48 and 60 months.

CD - Special, 3, 6, 9, 12, 24, 30, 36, 48 and 60 months.

MM - Regular.

MM - Special.

NPI contains national indexes. However, you might want to consider having the same indexes for your specific pricing regions.

Summary of Findings for this week

National APY

- Slight increase in aggregated average APY for CDs and MM nationally 0.01.
- Highest increase, CD Spl. 48-month 0.06.
- Highest decrease, CD Spl. 3-month -0.12.
- Highest spread between average Regular and Special in 24-month CD 1.07.
- Lowest spread between average Regular and Special in 3-month CD 0.46.
- Aggregated change in average APY since the beginning of the year -61 bps.

Repricing Volume

- Relatively high volume of repricing. Over two thirds (70%) of the products were repriced during the week.
- Highest repricing volume product - CD Special 12 months (153%).
- Lowest repricing volume product - CD Special 30-month (0.0%).

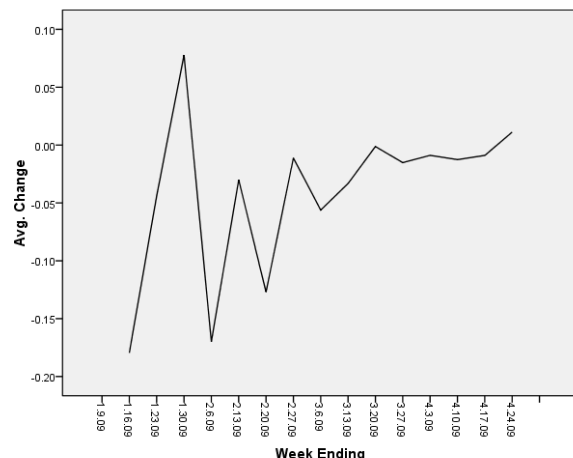

Main Trend for this week

National Average APY for CDs and MM may have stabilized. After five weeks of continued slight decline, the National Average APY rose a modest 0.01.

This week’s average increase of 0.01 may indicate that the National Average APY has reached bottom, and is now stabilizing at the current level.

The greatest fluctuation in the APY variance from last week to this week occurred in the Special CDs (18 bps flocculation) compare to 3 bps fluctuation in Regular CDs.

National Avg. APY fluctuation is stabilizing

National APY Index

The APY index features national averages for the highest APY, lowest APY and average APY for regular (Reg) and special (Spl.) selected CD and MM.

In addition, it provides the average change from the previous week across all selected deposit products. Raw data is also provided.

CD & MM Regular

- Highest increase, **no increase**
- Highest decrease, 60-month CD **-0.02**
- Average increase/decrease, **-0.01**

CD & MM Special

- Highest increase, 48-month CD **0.06**
- Highest decrease, 3-month CD **-0.12**
- Average increase/decrease, **no change**

CD Spl. 60 Mo.	2.10	3.75	3.062	3.03	0.00
MM Spl.	0.80	2.25	1.39	1.39	0.03

Methodology: The statistical analysis in this report is based on a convenience sample of 1,300 institutions as was determined by a-priori, two-tailed test. The t-Test was based on the following parameters: Alpha=0.05; Power=0.95; Effect size=0.20.

Premium APY Index

Premium APY index measures the spread between regular CDs and MM APY and Special CDs and MM APY

This spread is the premium that institutions are offering on Special products in order to attract balances.

- Highest APY premium, CD 24 months **1.07**
- Lowest APY premium, CD 3 months **0.46**
- Average APY premium, **0.86**

Figure 3

APY premium variance this week

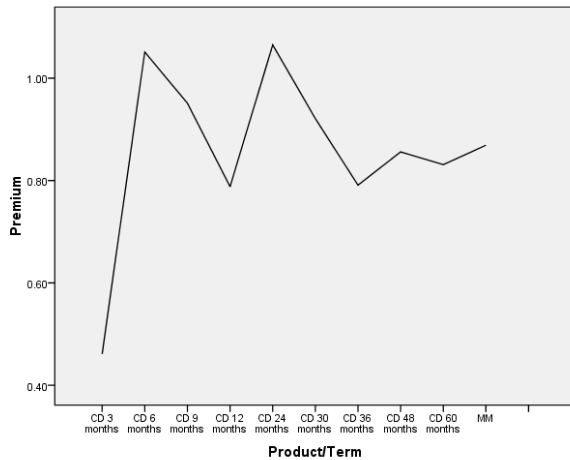

Table 3

APY premium variance this week

Product/Term	Reg. Avg.	Spl. Avg.	Premium
CD 3 months	0.70	1.17	0.46
CD 6 months	0.99	2.05	1.05
CD 9 months	1.00	1.95	0.95
CD 12 months	1.32	2.11	0.79
CD 24 months	1.56	2.62	1.07
CD 30 months	1.54	2.46	0.92
CD 36 months	1.80	2.60	0.79
CD 48 months	2.08	2.94	0.86
CD 60 months	2.23	3.06	0.83
MM	0.52	1.39	0.87

Historical APY Index

Historical APY index features national averages for the selected products over time. In addition, it provides a visual presentation of the relationship between the pricing of the different product averages.

Historical APY is helpful in identifying pricing patterns and possible trends.

- Average minimum APY this week, **1.07**
- Average maximum APY this week, **2.88**
- Average average APY this week, **1.80**

Repricing Volume Index

Repricing Volume Index features the level of rate changes during the week. An index of 100% means that, on average, all available rates of the sample products have been repriced.

The Repricing volume Index is helpful in observing the repricing activities for the featured week, and identifying products that are being repriced more frequently than others.

CD & MM Regular

- Highest repricing volume, **CD 48 months 113%**
- Lowest repricing volume, **MM 17%**
- Average repricing volume, **70%**

CD & MM Special

- Highest repricing volume, **CD 12-month 153%**
- Lowest repricing volume, **30-month 0.0%**
- Average repricing volume, **89%**

About Market Rates Insight

Market Rates Insight (MRI) is the premier provider of competitive-pricing information and analysis to the banking industry. MRI focuses on serving the pricing needs of financial institutions—not consumers. Therefore, only MRI offers the higher level of pricing comprehensiveness and sophistication of systems demanded by the industry.

Founded in 1985, Market Rates Insight was the first research service offering competitive financial market rate data online, in a searchable format. Over the past two decades, our research services have evolved with the needs of financial institutions.

Market Rates Insight also assists banks price their products in compliance to the FDIC Rules and Regulations. Specifically, MRI helps banks comply with FDIC Rule 337.6 on rate issues as well as establishing the proper Market Area in accordance to the Rules and Regulations.

As the leader in pricing intelligence for the financial industry, MRI provides industry data to thought leaders worldwide. Among them are The Wall Street Journal, American Banker, Western Independent Bankers, Novantas and others. These industry icons use MRI's data to report trends and analysis to the industry.

THE WALL STREET JOURNAL

Banks Wage Rate War for Deposits

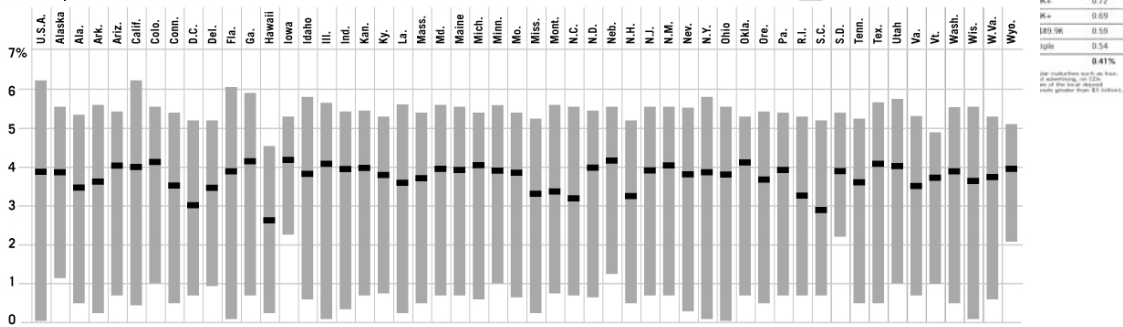

Unlike previous periods of turbulence, the Fed's rate-chopping campaign isn't relieving the pressure this time. In the past, reductions in the federal funds rate have helped level off interest rates on CDs and savings accounts, according to **Market Rates Insight Inc., which tracks pricing trends for financial institutions. "This time around, it's much more fierce,"** says Dan Geller, executive vice president of the San Anselmo, Calif., firm.

Retail CDs: Special-Term Competition
 Top rate premiums offered on special-term CDs in 15 largest deposit markets, from Novantas and Market Rates Insight. Week ended Feb. 9

(Seasonalized to irregular maturities, "special-term" CDs can help achieve select funding objectives and sometimes pay significant premiums. Off-term bidding against nine-month CDs continued to slide last week, with only five out of 15 markets participating. Nine-month premiums closed at an average of 0.74% across the top 15 markets, compared with 0.91% the previous week and 1.30% the week before. In six-month bidding, Houston and Dallas eroded premiums by 30 and 14 basis points respectively, and Boston dropped off the leader list, replaced by Miami.)
